Advanced Manufacturing Engineering

Index to Volume 1, 1988/89

Articles

1 A cell for the manufacture of composite components by filament winding, *D. G. Elliman, P. Sorenti, L. Brown, M. Shearing, V. Middleton, M. J. Owen* 15

2 A flexible loom board system to prove the manufacture of production cable harnesses, *G. P. Bertolotti, B. J. Griffiths* 296

3 A method of tool management based on an intelligent cutting tool, *H. Aoyama, T. Kishinami, K. Saito* 210

4 A planning expert system for part setup and workholding, *P. J. Englert, P. K. Wright* 249

5 Adaptive grinding control, *W. B. Rowe, S. Kelly, J. L. Moruzzi, J. A. Pettit* 287

6 An AI approach to process sequencing, *M. E. Ssemakula, D. S. Nau, R. M. Rangachar, Q. Yang* 271

7 An automated system design for reaction injection moulding, *G. R. Graves, G. Palliyil, R. C. McIlhenny* 243

8 An expert scheduler for tool-stock management in a CIM environment, *G. M. Acaccia, R. C. Michelini, R. M. Molfino, G. Raffaelli* 203

9 Automated placement of fine lead pitch surface mount electronic devices using vision guidance, *D. M. A. Oughton* 6

10 Automotive engine assembly and test, *C. Davis* 42

11 CAD/CAPP integration using IGES, *M. E. Ssemakula, J. S. Gill* 264

12 Competitiveness through manufacturing technology, *J. Parnaby* 4

13 Computer-aided production control system in an animal feed mill, *P. Kowalewski* 95

14 Design to product: An Alvey large-scale demonstrator, *J. F. Fowle, L. D. Burrow* 102

15 Development of a multi-processor controlled robot hand, *K. Yamafuji, T. Maeda* 21

16 Error recovery in assembly by robot, *A. H. Redford* 109

17 Expert monitoring and control of a failure-prone flexible manufacturing shop, *A. Villa* 147

18 Generic commands for production planning and control, *K. Vinodrai Pandya, R. Sotudeh, P. R. Bunn* 169

19 Industrial robot grasping devices: Principles of grasping, securing and positioning of objects, *S. N. Kolpashnikov, I. B. Chelpanov* 277

20 Integrated total engineering, *J. D. Alexander, J. Douglas* 11

21 Interchangeability: The key to effective engineering change control, *K. J. Balcerak, B. G. Dale* 141

22 OPT in perspective, *G. D. M. Frizelle* 74

23 Planned flexibility: The key to improved production, *K. Chaharbaghi, B. L. Davies, D. I. Sparshot, P. Janes* 155

24 Practical computer-aided process planning and estimating (CAPPE) solutions through advances in software engineering, *G. Jackson, R. Wilson* 165

25 Production oriented design: A knowledge-based approach, *K. G. Swift, M. E. Uddin, M. G. Limage, M. S. Bielby* 67

26 Rapid error correction of coordinate measuring machines for squareness, twist and scaling errors, *M. Woollett* 35

27 Recent manufacturing developments in Korea and Japan, *M. J. Gregory* 113

28 Research policy on manufacturing processes, *A. Demaid* 221

29 Setting goals for manufacturing improvements, *C. C. New* 49

30 Success and failure with advanced manufacturing technology: The need for a broader perspective, *B. Burnes, B. Weekes* 88

31 The dynamic analysis approach to manufacturing systems design, *D. R. Towill* 131

32 The influence of manufacturing processes on surface properties, *B. W. Kruszyński, C. A. van Luttervelt* 187

33 The introduction of a flexible manufacturing cell for heavy-duty switchgear enclosures, *B. Worthington, J. Carroll* 81

34 Tools for development of information systems in CIM, *R. K. Maji* 26

35 Towards zero defect assembly for surface mount technology, *N. Hobday* 217
